EDUCATION

Washington University in St. Louis

Doctor of Philosophy in Computer Science

St. Louis, MO

Aug. 2023 – Present

Washington University in St. Louis

Bachelor of Science in Computer Engineering, Master of Science in Cybersecurity Engineering

St. Louis, MO

Aug. 2020 – May 2023

DePauw University

Bachelor of Arts

Greencastle, IN

Aug. 2017 – May 2020

EXPERIENCE

Graduate Research Assistant

Washington University in St. Louis

May 2022 – Present

St. Louis, MO

- Research focuses on **system security and cyber-physical systems**.
- Analyzed IoT firmware updates, examining 150 images from 33 device families. Discovered **zero-day and n-day** vulnerabilities, leading to **25 CVE IDs and one PSV ID** through responsible disclosure.
- Developed experimental Linux scheduler enforcer for **timing violation detection and mitigation** with an **average performance overhead of only around 2.8%**.
- Performed sensitive analysis on Linux perf counters, assisting offline CPU performance profiling.
- Optimization on communication cost of Federated Learning. Reducing communication cost by **30%** while maintaining training accuracy of **95%**.

C++ Backend Development Intern

Youme.im

July 2020 – Sept. 2020

Shenzhen, China

- Developed an **end-to-end encryption module** for audio and video real-time communication
- Integrated the encryption module into the cross-platform compilation build workflow
- Utilizing optimization techniques to ensure **low-performance overhead** for encryption and decryption.

PROJECTS

Federated Learning Optimization | *Machine Learning, Federated Learning, Python*

Aug 2024 – Dec 2024

- Designed adaptive ML protocols for distributed predictive modeling, using **PyTorch, pandas, and NumPy**. Cut communication costs by **30%** while preserving **95%** training accuracy.
- Conduct an empirical study on communication cost for federated learning.
- Designed and optimized data pipelines for processing large-scale distributed datasets. Adaptive gradient compression rate can reach up to **210x**
- Real-world FL simulation demonstrates the feasibility of the proposed approach.
- Accepted by *2025 62th ACM/IEEE Design Automation Conference (DAC)*

HONOR AWARDS

2022 Dean's Select PhD Fellowship | *Washington University in St. Louis*

Nominated for the 2022 Dean's Select PhD Fellowship at Washington University in St. Louis.

Dean's List | *DePauw University*

Recognized on the Dean's List for 2017 and 2020

SERVICES

Reviewer

- IEEE Transactions on Information Forensics and Security
- IEEE/ACM Transactions on Networking
- ACM Transactions on Cyber-Physical Systems
- ISOC Symposium on Vehicle Security and Privacy (VehicleSec '24)

TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript, HTML/CSS, VHDL, Assembly, SQL, PHP

Frameworks: React, Node.js, ROS, ROS2

Developer Tools: Git, Cmake, Docker, VS Code, Visual Studio, Eclipse, Wireshark, Xcode, Ghidra, Database Management Systems, Excel, Gazebo

Libraries: pandas, NumPy, Matplotlib, Tkinter, Pytorch

OS: Linux Kernel Programming, Kernel Scheduler, Kernel Network Stack
