Zihan (Tomson) Li

bio.tomson.li Mobile: +1-765-301-1953

**EDUCATION** 

Washington University in St. Louis

St. Louis, MO

Doctor of Philosophy in Computer Science

(Anticipated May. 2028)

Email: tomson.li@tomson.li

Washington University in St. Louis

St. Louis, MO

Bachelor of Science in Computer Engineering, Master of Science in Cybersecurity Engineering

Aug. 2020 - May 2023

St. Louis, MO

DePauw University

Greencastle, IN

Bachelor of Arts

Aug. 2017 - May 2020

Experience

Graduate Research Assistant

May 2022 – Present

Washington University in St. Louis

• Research focuses on system security and cyber-physical systems.

- Conducted IoT devices firmware update pipeline vulnerability study. Validated 150 firmware images from 33 device families, leading to the discovery of both zero-day and n-day vulnerabilities. Our findings were disclosed responsibly, resulting in the assignment of 25 CVE IDs and one PSV ID
- Developed experimental Linux scheduler enforcer for timing violation detection and mitigation with an average performance overhead of only around 2.8%.
- Performed sensitive analysis on Linux perf counters, assisting offline CPU performance profiling.
- Optimization on communication cost of Federated Learning. Reducing communication cost by 30% while maintaining training accuracy of 95%.

C++ Backend Development Intern

July 2020 – Sept. 2020

Shenzhen, China

- Youme.im• Developed an end-to-end encryption module for audio and video real-time communication
  - Integrated the encryption module into the cross-platform compilation build workflow
  - Utilizing optimization techniques to ensure low-performance overhead for encryption and decryption.

**PROJECTS** 

Federated Learning Optimization | Machine Learning, Federated Learning, Python

- Aug 2024 Present • Developed adaptive machine learning protocols for predictive modeling in distributed environments, leveraging advanced statistical techniques and Python libraries such as Pytorch, pandas, and NumPy. Reducing
- communication cost by 30% while maintaining training accuracy of 95% • Conduct an empirical study on communication cost for federated learning.
- Designed and optimized data pipelines for processing large-scale distributed datasets. Adaptive gradient compression rate can reach up to 210x
- Real-world FL simulation demonstrates the feasibility of the proposed approach.

Honor Awards

2022 Dean's Select PhD Fellowship

Washington University in St. Louis

Nominated for the 2022 Dean's Select PhD Fellowship at Washington University in St. Louis.

Dean's List

DePauw University

Recognized on the Dean's List for 2017 and 2020

Technical Skills

Languages: C/C++, Python, Java, JavaScript, HTML/CSS, VHDL, Assembly, SQL, PHP

Frameworks: React, Node.js

Developer Tools: Git, Cmake, Docker, VS Code, Visual Studio, Eclipse, Wireshark, Xcode, Ghidra, Database

Management Systems, Excel

Libraries: pandas, NumPy, Matplotlib, Tkinter, Pytorch

OS: Linux Kernel Programming, Kernel Scheduler, Kernel Network Stack
